Dear all,

The Bring Your Own Approved Device (BYOAD) programmme, launched in August 2024, is designed to enhance the learning experience by integrating technology into everyday classroom activities. Through BYOAD, students bring school-approved devices to support research, collaboration, creativity, and critical thinking across subjects.

By empowering students with the right tools, we aim to foster greater independence, digital literacy, and engagement, preparing them for the future of learning and work. BYOAD is an important step towards building a dynamic and connected learning environment for all.

A quick look at what's buzzing in Beaconhouse Edtech Ecosystem!

Expanding Digital Learning: BYOAD Now in Class 8!

We are excited to announce that the Bring Your Own Approved Device (BYOAD) programme is expanding to Class 8 in the upcoming 2025-2026 academic year! This initiative builds on the success of BYOAD in Classes **5–7**, enhancing student engagement, collaboration, and digital literacy. Our teachers are continuously innovating and designing lessons that make full use of the device to personalize learning and promote critical thinking.

Tech Spark Innovator

Leading with Ideas, Inspiring with Action

Maida Bukhari

Primary Campus Block-3 Jauhar, Karachi

My name is Maida Bukhari and I am a school coordinator. Since joining Beaconhouse in 2016, I have witnessed the organization's timely and visionary shift toward modern education. While online teaching was still unfamiliar to many, our students were already using Edmodo. The rapid transition to Google Classroom during COVID enabled uninterrupted learning. Creating BSU learning videos and receiving the BSU Conferer badge remains a proud milestone. This ongoing evolution has equipped us to cultivate learner agency and shape globally aware, futureready learners.

The Digital Safety Corner

We are here to guide you on how to use the devices safely.

P Digital Safety & Security

- Use strong and unique passwords
- Enable two-factor authentication (2FA) on your official account.
- Be cautious with phishing emails, suspicious links, and downloads.

□ Intentional Tech Use

- Set **clear goals** before using your device —avoid passive scrolling.
- Turn off non-essential notifications to reduce distractions.
- Use tools like Focus Mode to manage screen time.
- Follow the 20-20-20 rule and take screen breaks to reduce digital fatigue.

3

Responsible Digital Citizenship

or sharing online. • Don't copy others' work—give credit if you

· Always be kind and respectful when talking

- use something from the internet.
- Keep your personal information private, and don't share your friends' info without asking.
