BYOAD Highlights

A quick look at what's buzzing in Beaconhouse Edtech Ecosystem!

Welcome to our new academic year 2025-26!

Kudos to our BYOAD classes for making last year a true success story and turning vision into reality! We are excited to welcome the new classes joining the BYOAD programme as their first step into the Beaconhouse Edtech Ecosystem journey.

Last year was full of learning—whether it was adopting technology, integrating it into lessons, exploring new tools, deepening understanding, or ensuring access. Together, we turned those challenges into opportunities for growth.

As we begin this new session, we look forward to exciting ventures—whether it's diving deeper into technology, integrating it meaningfully in classrooms, or rising high as champions of innovation.

Here's to another year of progress and discovery!

The Digital Safety Corner

Your guide to digital safety!

Raising Digital Citizens

Beaconhouse Parent Resource

Ensuring our children's digital safety has been our foremost responsibility throughout the last academic session. One key suggestion in the Parents' Townhall was to **'Talk to Your Child'**—an essential step in helping children navigate the online world with confidence. In line with this, Beaconhouse has developed a **Digital Citizenship Parent Guide** to support parents. The guide highlights safe, responsible, and ethical use of technology, stresses the importance of digital detox, and encourages parents to model positive habits while engaging in meaningful conversations at home.

Distinctive features of our **'Parent Guide'**.

- ✓ Parents Responsibilities
- ✓ Finding Balance: Practicing 'Digital Detox'
- ✓ Conversation Starters
- ✓ Tools & Resources

Learning Corner

This Month's Must-Try Tool – Learn It, Use It, Love It!

For teachers & students!

Smart Study with ChatGPT!

Discover ChatGPT's Study Mode—an AI-powered learning companion designed to support students with explanations, summaries, and practice questions. It encourages independent learning, critical thinking, and makes study sessions more engaging and effective.

For teachers & students!

Engage, Explore, Excel

With Google Gemini Guided Learning

Discover Google Gemini's Guided Learning—a smart AI companion that helps students with clear explanations, concise summaries, and personalised practice questions. It promotes independent learning, builds critical thinking, and makes study time more engaging and effective.

Tech Spark Innovator

Leading with Ideas, Inspiring with Action

Ayesha Aamir

Beaconhouse Jubilee Campus, Karachi

From boardrooms to classrooms, my journey has been anything but ordinary. With a Master's in Finance and 14 years of experience across both corporate and educational settings, I now work as an Instructional Coach and Mathematics teacher at Beaconhouse Jubilee Campus. Along the way, I have pursued continuous growth—completing a B.Ed. (Hons) and achieving distinction in the Cambridge PDQ Certificate in Teaching and Learning (CICTL).

What excites me most today is how digital innovation makes learning more interactive and engaging for students, while also helping teachers work more efficiently and creatively.
